How to set up your browser to use the searches:

Microsoft Explorer:

1. Look at the upper right corner of your Explorer Browser and you will see a "gear" icon. Float your cursor over it and it will show "See Tools (Alt X). Click on it and you will see Internet Options.

2. Go to Tabs and click Settings. You will see a number of click boxes. Choose the following:

   Enable Tabbed Browsing (requires restarting Internet Explorer).
   When a new tab is opened, select "The new tab page".
   When a pop-up is encountered, select "Always open pop-ups in a new tab".
   Open links from other programs in either a new tab in the current window or a new window.

Mozilla Firefox:

1. On the upper LEFT corner, click "Firefox", then Options. Select TABS and choose the following:

Open new window in a new tab.
Warn me when closing multiple tabs.

Google Chrome

1. On the upper RIGHT corner, click the Wrench icon. Chrome opens the windows automatically, but if you have problems, click the Wrench, then Options – Preferences – Under the Hood. The default setting is "Do not allow popups". If your TABS don't work you may have to change the setting to allow popups.

Apple Safari

1. On the upper RIGHT corner, click on the "gear" icon Select Preferences, Tabs and choose the following:

"Open pages in tabs instead of windows "Automatically".
"When a new tab or window opens, make it active".
